INTRODUCTION

CONGRATULATIONS on the purchase of your new Brinly-Hardy Broadcast Spreader! Your Broadcast Spreader is designed, engineered and manufactured to give you the best possible dependability and performance.

CUSTOMER RESPONSIBILITIES

Please read and retain this manual. The instructions enables you to assemble and maintain your Broadcast Spreader properly. Be thoroughly familiar with the controls and the proper use of the equipment. Know how to stop the machine and disengage the controls quickly. And please, always observe the "Safety" instructions.

SAFETY

SAFETY LABELS

UNDERSTANDING THE MACHINE SAFETY LABELS:

The machine safety labels shown in this section are placed in important areas on your machine to draw attention to potential safety hazards.

On your machine safety labels, the words DANGER, WARNING, and CAUTION are used with this safety-alert symbol. DANGER identifies the most serious hazards.

The operator's manual also explains any potential safety hazards whenever necessary in special safety messages that are identified with the word, CAUTION, and the safety-alert symbol.

SAFETY

OPERATE SAFELY

Keep bystanders away when you operate this machine.

Use this machine for intended purpose only.

This machine is intended for use in lawn care and home applications.

Do not let children or an untrained person operate machine.

Keep all parts in good condition and properly installed. Fix damaged parts immediately. Replace worn or broken parts.

Do not modify the machine or safety devices. Unauthorized modifications to the machine may impair its function and safety, and void the warranty.

Do not let anyone sit or ride on equipment during operation. Keep riders off attachment.

Wear substantial footwear and long trousers. Do not operate the equipment when barefoot or wearing open sandals.

Do not wear loose fitting clothing that can get caught in moving parts.

Always wear eye protection when operating the equipment.

Stay alert for holes in the terrain and other hidden hazards.

Watch out for traffic when crossing or near roadways.

Before you operate any feature of this machine, observe your surroundings and look for bystanders.

Always wash hands after contact with fertilizers and pesticides.

Keep all nuts, bolts and screws tight to be sure the equipment is in safe working condition.

PARTS BREAKDOWN

Handle/Frame Exploded

Hopper/Frame/Axle Exploded

ASSEMBLY

TOOLS REQUIRED:

2- 10mm Wrenches

Figure 1

1. Remove two M6 locknuts and M6 x 45mm long bolts to remove pivot and bracket assembly from wheel frame tubes. Set bolts and nuts to the side. You will re-install them in Step 3.

Figure 2

2. Tilt arm assembly, and insert rod into flow control handle.

ASSEMBLY

Figure 3

3. Insert arm assembly between frame tubes. Reinstall pivot and bracket assembly through wheel frame tubes and arm assembly with two M6 x 45mm bolts and M6 locknuts removed in Step 1.

Figure 4

4. Tighten nuts and bolts on both sides of spreader at locations shown.

Figure 5

5. Push the flow control handle downward to the fully closed position, close the shut off plate under the hopper, and hand tighten bottom nut on linkage rod until snug. Hand tighten top nut on linkage rod until snug.

Figure 6

6. NOTE: The edge of the wingnut is the marker, and not the center of wingnut. When the flow control handle is opened fully, the edge of the wingnut should be on the 30 mark.

Set edge of wingnut on 30 mark and tighten.

Move flow control handle upward and back downward, and verify the shut off plate under hopper opens and closes properly. If necessary, adjust linkage rod nuts and tighten hand tight.

Figure 7

▲IMPORTANT Avoid damage! Only use a wrench on the lower nut.
Do not use wrench on the upper nut.

7. Once adjustment is complete, tighten lower nut on linkage rod with wrench.

Figure 8

8. Handle can be lowered by removing bolts and nuts and moving handle assembly downward, using upper holes for bolts and nuts.

OPERATION

READ BEFORE USING

Become Familiar With The Operation Of The Spreader Before You Put Material In The Hopper.

Practice walking with the spreader, opening and closing the rate gate at the appropriate times.

Travel at a constant speed and operate the spreader lever position. Remember: Open the rate gate after the spreader is in motion at operating speed (about 3 mph, or at a brisk walking pace).

Close the rate gate while spreader is still at operational speed.

Flow Control Setting Information

The flow control lever operates the control plate. The control lever plate is marked 0-30. The position selected determines the amount of material to be broadcast. The higher the number, the heavier the application of the material. This allows for accurate control of the spreading rate.

The fan speed and the spread width are controlled by the speed at which you operate the spreader. The spread width also depends on the volume/density, and the particle size of the material.

The spread thins or feathers at the outer edges, eliminating sharp, "Edge Of Spread" lines which cause stripes and streaks. Extra coverage can be given under trees and other heavy feeding areas without showing "Edge Of Spread" lines.

Gaps and double overlaps are less likely. Small errors in travel are forgiven and do not show.

Filling The Spreader

⚠ WARNING Avoid Injury! Chemicals can be dangerous. Avoid injury to operator or bystanders:

- Read chemical container label for handling instructions. A Material Safety Data Sheet (MSDS) should be supplied by the chemical dealer and provides proper safety information.
- Wear proper clothing and safety equipment while handling or applying chemicals.
- Prohibit all smoking, drinking, and eating around chemicals.
- When spreading products containing herbicides, exercise extreme caution with respect to careless spreading and to wind-drift. Contact Of Some Products On Some Plants Can Be Fatal.

Operating Tips

Push flow control lever down towards hopper to close the rate gate.

Fill the spreader on a flat, level surface only. Fill on sidewalk, driveway, cardboard, etc. to avoid material loss.

DO NOT overload with more than maximum capacity of 50 lbs.

DO NOT use on windy days.

When filling hopper with material, always use screen to help break up clumps.

Keep spinner blade clean. Excess material build-up can cause an uneven spread pattern.

Keep the impeller level when spreading.

Spreading Material

Determine setting required for the product you are spreading (See Application Rate Chart). If a setting is not found, use a similar size/weight material. Determine a flow control setting on the low side. If the setting proves to be too low, cover the area more than one time. A higher setting can be used when a proven setting is established. Generic Grass Seed and Fertilizer Settings are shown at the end of the list.

Remember: Published flow control settings are approximate only. The operation of the spreader, the condition of the material (damp or dry or over-pulverized) and weather conditions, are all contributing factors. For these reasons, it is often a good idea to spread the area 2 times - or one-half rate - in cross directions. One-half rate settings are highly recommended under damp and humid conditions.

Rotary Agitator

Use the rotary agitator only if needed. Free-flowing, lump-free materials will not require the agitator. The rotary agitator is easily installed or removed. Place felt washer around spinner shaft before inserting agitator.

Never leave fertilizer or other material in the hopper. It can draw moisture, form clumps, and cause unnecessary rusting or jamming of controls and other parts. Ice melt residue is especially corrosive. Clean and oil spreader immediately after each use.

OPERATION

NOTE: When determining required setting, the edge of the wingnut is the marker, and not the center of wingnut. When the flow control handle is opened fully, the edge of the wingnut should be on the 30 mark.

IMPORTANT! Remember to start and stop the spread while moving. Do not open the flow control lever while stopped or material will simply run onto the ground without being spread.

Spread header strips at each end of area. This allows a turn-around area to align spreader for next pass. Then start on the edge of the area to be spread. Spread until you hit the header area. Turn the flow control handle to off while still moving. Make your turn and start down the next row. Turn the flow control handle back on as you hit the edge of your header area. Turn the flow control handle on while move.

Spreading Ice Melt

Remove screen from hopper to prevent damage.

Start with flow control setting at 20 and make a trial pass. Adjust as needed to increase or decrease coverage.

When complete be sure to thoroughly clean spreader as ice melt can be highly corrosive.

Re-install screen when complete.

Calibrating Shut Off Plate

See Figure 6 and Figure 7 on page 8 and 9.

MAINTENANCE

To ensure years of trouble free service, clean the spreader thoroughly after each use. Move flow control handle as you rinse to avoid build up of material.

For rust on frame parts, sand lightly and paint with enamel.

Periodically lubricate all bearing surfaces.

Never allow material to remain in hopper for extended periods of time.

Periodically check all fasteners for tightness.

TROUBLESHOOTING

Flow control handle is hard to actuate or will not move:
Check for buildup of material between bottom of hopper and shut off plate. Clean as needed.

MANUFACTURER'S LIMITED WARRANTY FOR

Accessories

The limited warranty set forth below is given by Brinly-Hardy Company with respect to new merchandise purchased and used in the United States, its possessions and territories.

Brinly-Hardy Company warrants the products listed below against defects in material and workmanship, and will at its option, repair or replace, free of charge, any part found to be defective in materials or workmanship. This limited warranty shall only apply if this product has been assembled, operated, and maintained in accordance with the Operator's manual furnished with the product, and has not been subject to misuse, abuse, commercial use, neglect, accident, improper maintenance, alteration, vandalism, theft, fire, water, or damage because of other peril or natural disaster.

Normal Wear Parts or components thereof are subject to separate terms as follows: All normal wear parts or component failures will be covered on the product for a period of 90 days.

Parts found to be defective within the warranty period will be replaced at our expense. Our obligation under this warranty is expressly limited to the replacement or repair, at our option, of parts found to be defective in material and workmanship.

HOW TO OBTAIN SERVICE: Warranty parts replacements are available, **ONLY WITH PROOF OF PURCHASE**, through our Customer Service Department. Call 877-728-8224.

This limited warranty does not provide coverage in the following cases:

- Routine maintenance items such as lubricants and filters.
- Normal deterioration of the exterior finish due to use or exposure.
- Transportation and/or labor charges.
- The warranty does not include commercial and/or rental use.

No implied warranty, including any implied warranty of merchantability or fitness for a particular purpose, applies after the applicable period of express written warranty above as to the part as identified below.

No other express warranty whether written or oral, except as mentioned above, given by any person or entity, including a dealer or retailer, with respect to any product, shall bind Brinly-Hardy Co. During the period of the warranty, the exclusive remedy is repair or replacement of the product as set forth above.

The provisions as set forth in this warranty provide the sole and exclusive remedy arising from the sale. Brinly-Hardy Co. shall not be liable for incidental or consequential loss or damage including, without limitation, expenses incurred for substitute or replacement lawn care services or for rental expenses to temporarily replace a warranted product.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above exclusions or limitations may not apply to you.

During the warranty period, the exclusive remedy is replacement of the part. In no event shall recovery of any kind be greater than the amount of the purchase price of the product sold. Alteration of safety features of the product shall void this warranty. You assume the risk and liability for loss, damage, or injury to you and your property and/or to others and their property arising out of the misuse or inability to use this product.

This limited warranty shall not extend to anyone other than the original purchaser or to the person for whom it was purchased as a gift.

HOW STATE LAW RELATES TO THIS WARRANTY: This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

IMPORTANT: The Warranty period stated below begins with the **PROOF OF PURCHASE**. Without the proof of purchase, the Warranty period begins from the date of manufacture determined by the serial number manufacturing date.

SPREADER WARRANTY PERIOD:

The warranty period for this spreader is as follows: 1 year non-commercial use. Tires and wheels are normal wear items: 90 days.
